

Environmental Policy

NT Industry, based on our core competencies, produces high-quality products that are environmentally friendly. Within the NT Group, we create and develop new projects, products and operations with environmental protection and sustainability in mind. We strive to minimize the negative impact of our activities on the environment and take responsibility for protecting natural resources and the climate

We ensure the implementation of our environmental policy by:

- Using modern technologies and introducing innovative solutions that enable the production of machinery and products that are safe for people and the environment.
- Rational management of natural resources and reduction of negative impact on the environment and climate change.
- Ensuring that our products and services meet growing environmental requirements, including the reduction of CO2 emissions.
- Increasing the share of renewable energy in production and technological processes
- Promoting environmental awareness among employees, customers and suppliers.
- Sustainable management of waste generated in production processes and prevention of environmental pollution.
- Providing adequate resources for continuous improvement of the environmental management system to improve the environmental performance of operations and meet compliance obligations.

NT Industry is committed to actively maintaining and improving the environmental management system, which is one of the key elements of our business and a factor in the success of our company.
